

## Winter Courses in Epidemiology

January – April 2024

The EpidM Winter Courses provide a unique possibility to take advanced-level epidemiology and applied biostatistics courses, while experiencing the beautiful city of Amsterdam.

One of the strengths of these courses is the combination of lectures and computer practicals, allowing participants to put their newly gained knowledge into practice the same day.

In 2024 we have an enticing programme, covering the following topics:

- [Multilevel Modelling and Longitudinal Data Analysis](#)
- [Clinical Prediction Models and Machine Learning](#)
- [Missing Data](#)
- [Clinimetrics, \(online\)](#)
- [Item Response Theory \(online\)](#)
- [Lifestyle Epidemiology](#)
- [Introduction to Bayesian Statistics](#)
- [Causal Inference and Propensity Score Methods](#)

For detailed information, click on the course link or visit [our website](#).

Candidates who sign up for multiple winter courses receive a 10% discount.

Register now and come join us in the EpidM Winter Course programme. A chance not to be missed! We very much look forward to seeing you!
