Winter Courses in Epidemiology

a program Course in Epidemiology in January and February 2023

The EpidM Winter Courses provide a unique possibility to follow advanced level epidemiology and applied biostatistics courses while experiencing the beautiful city of Amsterdam

One of the strengths of these courses is the combination of lectures and computer practical's, which allows participants to put into practice in the afternoon what they have learned in the morning. In 2023 we have a very interesting program which covers:

- Multilevel Modelling and Longitudinal Data Analysis (Hybride course: on location or online)
- Clinical Prediction Models and Machine Learning, (on location)
- Missing Data (on location)
- Clinimetrics, (online course)
- Item Response (online course)
- Theory and Lifestyle Epidemiology (on location)
- Causal Inference and Propensity Score Methods (on location)
- Baysian Statistics (on location)

For detailed information click on the course link or visit our website.

What's more, if you sign up for more than one course in the winter program, you will be offered a reduced fee on all your chosen courses.

Register now and get involved in the EpidM Winter Courses. A chance not to be missed! We very much look forward to seeing you!
